

Taylor Diagram — All Targets by Domain Family (Supplementary)

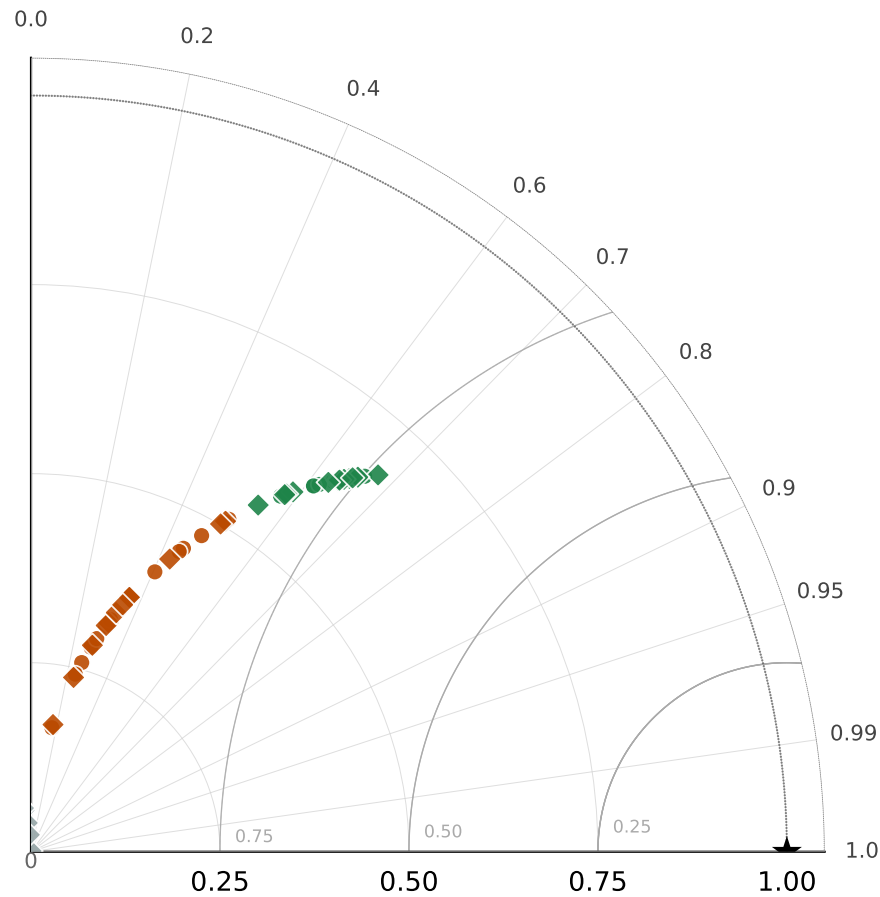

RF and XGBoost predictions vs. Antarctic soil observations | Leave-one-location-out CV | $n = 171$ | Normalized σ_n | $\uparrow$ log-transformed

Arc: correlation r | Radial distance: σ_n | Dashed arcs: centered RMSD | Circle = RF, Diamond = XGBoost

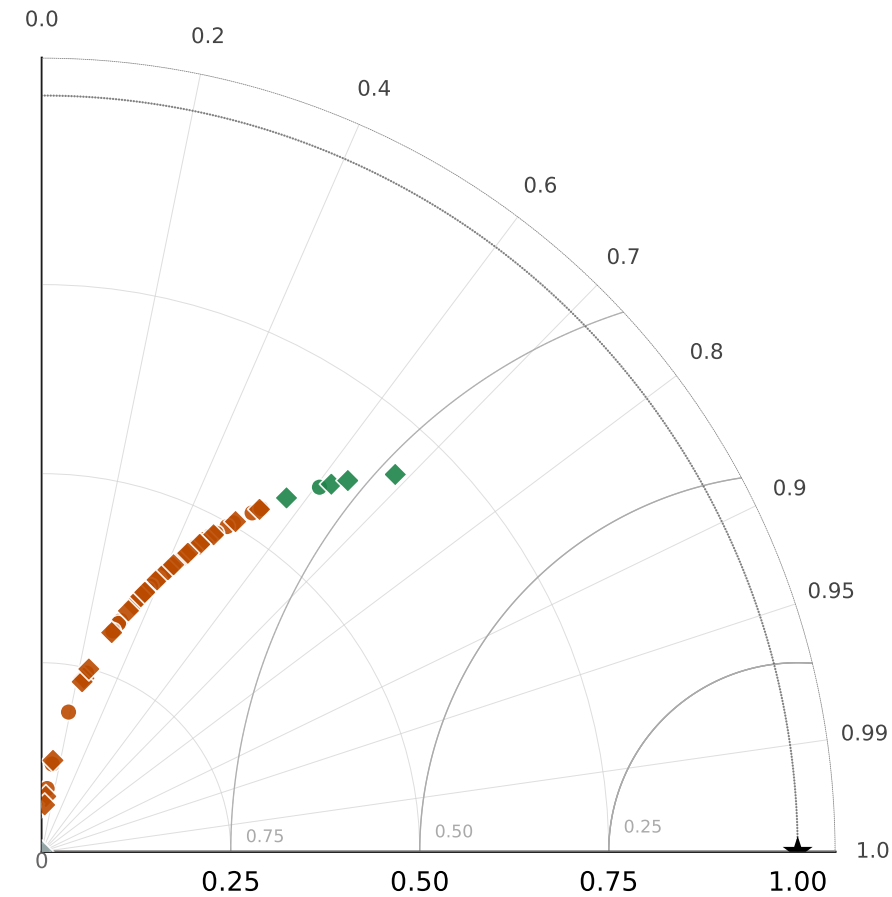

Soil Properties (9 variables)

Digest Metals (29 variables)

Water Chemistry (31 variables)

Normalized standard deviation σ_n
